

Why Solar?

Own Your Power, Produce Clean Energy!

How Solar Works

1. Energy from the sun reaches your solar panels and is instantly converted into DC electricity.
2. The electricity flows through an inverter box where it is changed into safe-for-your-home AC power.
3. You use the power generated by your home. Net metering allows you to utilize excess power generated during periods of time without sun.

Federal Tax Credits

Under the American Recovery and Reinvestment Act of 2009 homeowners are eligible for a federal personal income tax credit up to 30% of the purchase cost of their renewable energy system, without a maximum limit.¹

The Process

- a. Visit our website or contact a Loan Advisor to pre-qualify.
- b. A Loan Advisor will also guide you through the application process.
- c. Once approved, you will receive your funds, install your system and produce clean energy.

Your Energy Savings
